## Need help?

**The screen doesn't respond.** Turn on **Self Interact** in VRChat's settings, and tap with the very tip of the stylus.

**The stylus doesn't hide when switched off.** Open the Install Wizard and press **Update**.

**TalonSync is waiting for VRChat.** Turn on OSC in VRChat (Action Menu › Options › OSC), then in TalonSync run Settings › Connection › **Connection doctor** › Fix and switch avatars once.

**Shader compile timed out.** Tools › Talon Pilot › Allow Long Shader Compiles, restart Unity, and reimport the TalonPilot folder.

### Good habits

• Switch the PDA off when you're not using it: almost all of its work stops.
• To move it to a wing or paw, use **Anchor points** in the wizard, not drag-and-drop.
• Your text, settings and pet are saved on the avatar. TalonSync keeps dated backups too.

The Handbook covers every app, every preference, desktop mode, TalonSync's file formats and settings, and the (entirely fictional) regulatory fine print.

Talon Pilot is a virtual device for VRChat avatars and is not affiliated with or endorsed by VRChat. This virtual device complies with Part 15¾ of the Federal Cyberspace Commission Rules (fictional) and contains no batteries.

## Meet your Talon Pilot

A pocket-sized organizer for your avatar: calendar, contacts, tasks, memos, a calculator, world clock, 3D viewer, a pet owl, a weather channel and more, synced with your computer by **TalonSync**.

### Controls

| | |
|---|---|
| **Touchscreen** | Tap icons, rows, keys and buttons. |
| **Home** | The house on the bottom bar: back to the launcher. |
| **App buttons** | Calendar, Contacts, Tasks, Memos (change them in Prefs › Buttons). |
| **5-way** | Up/Down move, Left goes back, Right/Center select. |
| **Stylus** | In your other hand whenever the PDA is on. |

### Expressions › Talon Pilot

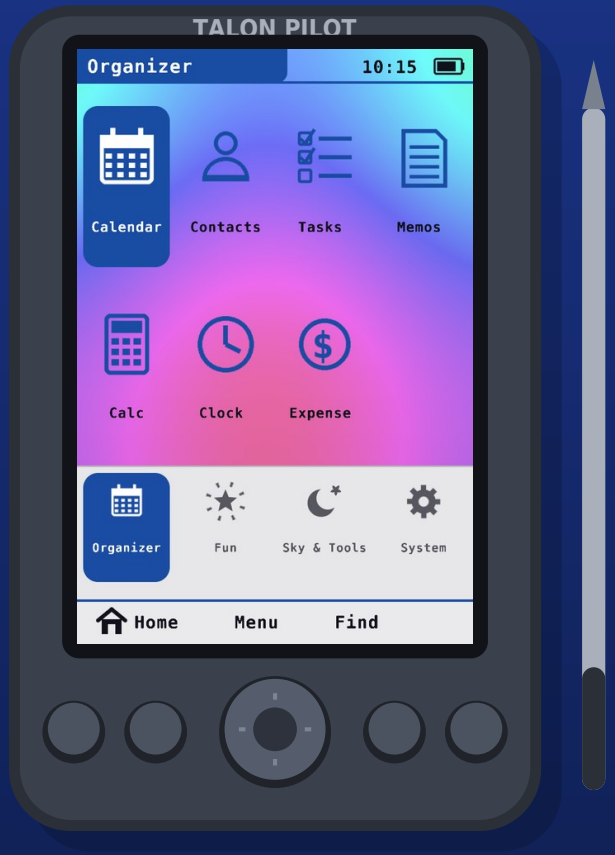

**Power** · **Apps** (jump to any app) · **Controls** (5-way and Home) · **Desktop** · **Reset** · **Factory Reset**

### Desktop players

No headset? The PDA moves in front of your view. Stand still and it parks; aim the dot in the middle of your screen at a button and press the **middle mouse button** (TalonSync 1.7 running). Or: Expressions › Talon Pilot › Desktop › Tap where I look. Lost it? Desktop › Bring PDA in front.

# Talon Pilot

Quick Start Guide

**TALON OS**

Read this first. The full Handbook has everything else.

Talon Pilot 2.15 · Created by NevvyDrone · nevvydrone.com

# 1 Install

1. Copy the package's **Assets/TalonPilot** folder into your Unity avatar project (Unity 2022.3, VRChat Avatars SDK 3).
2. Choose **Tools › Talon Pilot › Install Wizard**.
3. Type the name you'd like the PDA to call you.
4. Drag your avatar into the box.
5. Choose the hand that holds it, how you tap (Stylus, Finger or Both), the size and a theme.
6. Press **Install Talon Pilot**, nudge the PDA into your palm, and upload.

## Wings or paws?

In **Anchor points**, click the bone in the Hierarchy and press **Use selected**, or pick one from **Suggestions**.

## Updating later

Copy the new folder over the old one, open the wizard, choose your avatar and press **Update**. Everything is kept.

## Before you play

In VRChat's settings, turn on **Self Interact**, or the screen can't feel your stylus.

# 2 Switch on and explore

1. Open your Expressions menu: **Talon Pilot › Power**. Listen for the chirp.
2. Tap an icon with the stylus tip, or use the 5-way. The tabs along the bottom switch category.
3. Tap the **house** on the bottom bar to come home.
4. To type, open an item and tap its line. Tap **Done** to save.

## Apps at a glance

Calendar · Tasks · Calc · Clock

Talon 3D · Hoot Pet · TalonStar · Hypno

## Make it yours

- **Prefs › Display**: five color themes, wallpaper and screen effects.
- **Prefs › Size & Power**: resize it in game, and set auto-off.
- **Prefs › Buttons**: choose what the four app buttons open.
- **Prefs › Screensaver**: Mystify, 3D Pipes or Hypnospiral.

# 3 Sync with TalonSync

TalonSync is the desktop software that keeps your PDA and computer in step, backs everything up, shows your music and runs the weather channel.

1. **Windows:** install Python 3.13 or 3.14 (tick *Add python.exe to PATH*), then double-click **Build TalonSync.bat** and run **TalonSync.exe**.
   **Linux:** run **Run TalonSync.sh**. **macOS:** double-click **Run TalonSync.command**.
2. In VRChat: Action Menu › Options › **OSC › Enabled**.
3. Wear your avatar. The two lights in TalonSync's sidebar turn green.
4. Press the big **TalonSync** button, or tap TalonSync on the PDA. The PDA chirps when it's done.

## Also in TalonSync

- **TalonStar 4000**: real local weather with smooth jazz, on your PC and your PDA.
- **Now Playing**: the song on your computer, on your PDA.
- **Import & Export**: vCard, iCalendar, CSV, Markdown and pictures.
- **Demo PDA** (Settings › Connection): try it all without VRChat.
